The above Steamers convey Passengers to Marseilles, Plymouth and London.

Passengers for Brindisi transhipto a connecting steamer at Port Said.

HEAVY BAGGAGE must be sent to the BALLARD PIER on FRIDAY AFTERNOON the day previous to sailing, and CABIN BAGGAGE before 9 A.M. on SATURDAY. The attention of Passengers is called to the importance of having their Baggage labelled with Port of Destination.

Tenders leave the Ballard Pier on day of sailing. All Passengers must attend at that place between 12 and 12-30 o'clock P.M. for Medical Inspection by the Health Officer of the Port, and no one will be allowed on Board the Mail Steamer unless so examined, and conveyed thence in the Company's Steam Barges. Special attention is directed to these regulations, which are imperative under the Venice Convention.

Friends of passengers cannot go on Board the Mail Steamer.

TO COLOMBO, STRAITS, CHINA, AND AUSTRALIA.

The Company's Steamers leave Bombay fortnightly usually on TUESDAYS, taking Passengers for the Straits, China, and Japan, and Return Tickets are issued on favourable terms.

Cargo Steamers are despatched to China at frequent intervals calling at ports en route.

FRANK RITCHIE,
Superintendent, P. & O. S. N. Company.

A SAFE REMEDY FOR ALL SKIN AND BLOOD DISEASES

If you suffer from any disease due to be impure state of the Blood, FROM WHATEVER CAUSE ARISING, you should test the value of Clarke's Blood Mixture, the world-famed Blood Purifier and Restorer. This medicine has 40 years' reputation, and is to-day more popular than ever, the reason of this being undoubtedly because this wonderful remedy does what it professes to do—IT CURES SKIN AND BLOOD DISEASES PERMANENTLY.

Clarke's Blood Mixture

IS THE FINEST BLOOD PURIFIER EVER DISCOVER

It is warranted to cleanse the blood from all impurities, from whatever cause arising. For

SCROFULA,	BAD LEGS,
SCURVY,	BLOTCHES,
ECZEMA,	SPOTS,
BLOOD POISON,	BLACKHEADS,
ULCERS,	PIMPLES,
SKIN & BLOOD DISEASES,	AND SORES OF ALL KINDS

it is a safe and Permanent Remedy.

It is the only real specific for Gout and Rheumatic Pains, for it removes the cause from the Blood and Bones.

NOTE. This mixture is pleasant to the taste and warranted free from anything injurious to the most delicate constitution of either sex, from infancy to old age, and the Proprietors solicit sufferers to give it a trial to test its value.

Thousands of wonderful cures have been effected by it.

TRIED MANY THINGS WITHOUT BENEFIT UNTIL I TOOK CLARKE'S BLOOD MIXTURE.

Mr. F. E. Lewis, 48, Bridge Street Row, Chester, writes :—"Just a line in favour of 'Clarke's Blood Mixture.' I had eczema for seven months, and tried many things without benefit until I took your remedy. After the eighth bottle I was quite well again. Please accept this letter as a token of gratitude to your wonderful 'Clarke's Blood Mixture.'"—June 13, 1908.

IMPURITIES IN THE BLOOD.—"We have seen hosts of letters from all sorts and conditions of people, in which the writers acknowledge the benefit they have received from Clarke's Blood Mixture, which as a curative agent cannot be too highly estimated, since it cleanses and clears the blood from all impurities, and restores it to its normal condition." This is a good testimonial from the *Family Doctor*, the popular medical weekly, which goes on further to say : "It is certainly the finest blood purifier that science and skill have brought to light, and we can with the utmost confidence recommend it to our subscribers and the public generally."

Sold by all Chemists and Patent Medicine Vendors throughout the World.

A BROKEN-DOWN SYSTEM.

This is a condition (or disease) to which doctors give many names, but which few of them really understand. It is simply weakness—a break-down, as it were, of the vital forces that sustain the system. No matter what may be its causes (for they are almost numberless), its symptoms are much the same : the more prominent being sleeplessness, loss of appetite, depression of spirits and want of energy for all the ordinary affairs of life. How, what alone is absolutely essential in all such cases is restored vitality—vigour—

VITAL STRENGTH & ENERGY

to throw off such morbid feelings and experiences as these that are the day this may be effectually secured by a course of the celebrated Nerve-strengthening tonic

THERAPION No. 3

Many of the symptoms of the above-mentioned disorders accompanying it, and which, in their turn, aggravate the original disease, will disappear as the health is restored.

THE EXPIRING LAMP OF LIFE

is built up by THERAPION No. 3, and a new and healthy flame is kindled, which burns with a clear and steady light, and is fed by the pure blood which is supplied by the digestive organs when they are in a healthy condition. This wonderful and successful remedy for all constitutional disorders is sold by all Chemists throughout the world, in sealed packages, at 2/9 and 4/6 each, and can be obtained in any part of the world. Full directions for use in various diseases or derangement, which are peculiar to each of those of debility, that will not be found in any other, and it is difficult to say which of the many disorders it will not benefit and permanently heal, by the restoration of the nervous energy, which is declared to be the one thing everything that has life and is for the well-being and continuance of human existence.

THERAPION is sold by Chemists throughout the world. Prices England, 2/9 and 4/6. Purchasers should see that the word "THERAPION" appears on British Government Stamp (in white letters on a red ground) affixed to every package by order of His Majesty's Hon. Commissioners of Inland Revenue, which has a fac-simile of the signature of the Government Stamp.

SOLD BY TREACHER & Co.,
BOMBAY BYCULLA AND POONA.

TRY! TRY!! TRY!!!

DR. SPOONER HART'S

1. PREPARED MEAL No. 1 for DOGS. 2 PREPARED MEAL No. 2 for PUPPIES
3. BISCUITS for DOGS. 4 PREPARED FOOD for POULTRY.
5. "NUTRIENT" (a rich Fluid Food given with the ordinary Food for HORSE and CATTLE).

1. Every Dog owner should use Dr. Spooner Hart's Prepared Meal No. 1 for Dogs, a staple diet of great value and equally suitable for all classes.

Re. 1-0 per 10-lb bag.

2. PREPARED MEAL No. 2 for PUPPIES.—This will be found "par excellence" the Food for them. Being soft and nutritious, Puppies thrive and fatten upon it and there is no fear of worms developing in the bowels (which Puppies are so liable to when fed on other materials) whilst they are on this food

CALCUTTA.

DR. DE ROOS'
WORLD-FAMED
GUTTÆ VITÆ
Or, LIFE DROPS.

The Great European Remedy for Nervous and Functional Exhaustion.

This remarkable rejuvenating essence strengthens the vitality of the whole system, gives energy to the muscles, and speedily restores the impaired powers of life, imparting strength and manly vigour to the most debilitated and worn out constitution. Those who suffer from Premature Decay, or deficiency of the Vital Forces, owing to dissipation, worry, overwork, excesses, or any other cause, will find this medicine just what they require. Equally adapted for the studious and sedentary ; the aged and infirm ; the nervous and debilitated ; as also for delicate females and weakly children. All sufferers from loss of appetite, nervous headache, irritability, and despondency—too often accompanied with suicidal thoughts—should make immediate and fair unprejudiced trial of this wonderful medicine, which is daily effecting the most remarkable cures in patients who had been given up by the Faculty as incurable, and left to drag out the remainder of their existence a misery to themselves, and a continual anxiety to their friends. In all cases of nervous and functional debility, epilepsy, impurity and poorness of the blood, aversion to and incapacity for society, study, or business, giddiness, disturbed sleep, harassing dreams, loss of memory, and other symptoms, the result of self-acquired ailments that embitter and shorten life, it is truly unrivalled. To married persons especially, this preparation will prove invaluable, giving strength and vigour in place of lassitude and incompetency. Price 11s., or four times that quantity, 33s. per bottle.

Dr. DE ROOS' COMPOUND RENAL PILLS, for Pains in the Back, Gravel, Lumbago, Gout, Rheumatism, Diabetes, and all Kidney Affections ; weakness across the loins, Sandy or other Deposits, Dis...ges, and Diseases of the Urinary Organs generally. Price 2s. 9d.

Dr. DE ROOS' VEGETABLE LIFE PILLS, for Indigestion, Biliousness, and all disorders of the Liver, Stomach, and Bowels ; whilst as a universal family medicine for both sexes, and all ages, they are unequalled. 13½d. and 2s. 9d. per Box.

Dr. DE ROOS' PILE AND FISTULA PILLS, the only reliable remedy for these annoying and painful ailments. The first dose gives relief, and in all ordinary cases a few days only are necessary to effect a cure. Price 2s. 9d. per Box.

Purchasers are particularly requested to see that every package of Dr. DE ROOS' Medicines bears the British Government Stamp, with the words, "WALTER DE ROOS, LONDON," impressed thereon in white letters on a red ground, and refuse worthless imitations frequently put forward by unscrupulous vendors for the sake of extra profit.

DEBILITATED and NERVOUS SUFFERERS should read the "Medical Adviser," by Dr. DE ROOS, on the secret causes of nervous debility, impotency, depression of spirits, and confirmed melancholy. Price 1s., post free from Mr. LAWES, Medical Publisher, 14 Hand Court, Holborn, London, W.C., or obtainable of the Agents for Dr. DE ROOS' Medicines.

Sold by TREACHER & Co. Ltd., Bombay, Byculla, Poona.

A LADY WAR CORRESPONDENT

Wins Distinction—

Among the many brilliant and distinguished women of to-day, few have had a more interesting and hazardous career than Lady Briggs. As correspondent of the *Morning Post* in the Soudan Campaign and the Boer War, her vigorous descriptive accounts speedily compelled wide-spread attention. Lady Briggs had already achieved phenomenal distinction when in 1897 she daringly edited "Naval Administrations—1827 to 1892," the great work of her late husband, Sir John H. Briggs, who for 65 years was chief clerk and Reader to the Lords of the Admiralty. But it was reserved until 1901 for Lady Briggs to attain a unique distinction for her sex, by the publication of her remarkable book "The Staff Work of the Anglo-Boer War." Her astonishing activities and literary labours induced an intellectual weariness which expressed itself in severe headaches and neuralgia, and in the letter which follows, Lady Briggs conveys her gratitude for the effective manner in which Phosferine arrested all her Nerve Disorders and restored and reinforced her Nervous System.

And Speaks for Herself.

Lady E. C. Briggs, 5, Charles St., St. James' Square, London, S.W., writes:—"I have tried Phosferine and have much pleasure in bearing testimony to its efficacy as a brain and nerve tonic, and its powerful effects as a restorative, as well as in cases of neuralgia and headache resulting from brain-fag."—February 23, 1905.

The Royal Example.

Phosferine is used by the Royal Families of Europe which, in plain language means that every user of Phosferine knows and feels that the Tonic is commended by the greatest living Physicians.

PHOSFERINE

The Greatest of all Tonics.

THE BATTLE OF PORT ARTHUR

Is not to be Compared with the Great Fight that Humanity is waging Against Disease.

Vitality lost through youthful indiscretion, old age and long residence in tropical climates is restored permanently, while youthful vigour is imparted to the wasted constitution by our Curative treatment.

The most Rational, Scientific and up-to-date treatment can be obtained only from Macdonald, Joseph and Co. Specialists in Nervous diseases. One of the greatest errors that people fall into is to believe that a single remedy can be prepared to cure all diseases, brought on by a variety of causes and varying also according to individual constitution. Is such a thing possible? We ask. Certainly not. This fact is recognised by all medical men who very properly veto patent medicines. Our chief objects are to aid the suffering and place the fruits of our skill and experience at their disposal with as little cost to them as possible.

Our Board of Specialists is composed of men of wide fame in their profession and when they undertake a case they guarantee a cure, no matter how far advanced the disease may be.

Every case is treated with the strictest confidence.

A WORD TO SUFFERERS.

Do not despair even if your case has been pronounced as hopeless by your Medical Attendant. But apply without delay for a copy of our Confidential Consultation Sheet, and we guarantee to cure you. If you faithfully carry out our instructions.

Can be had only from—

MACDONALD JOSEPH AND CO.,

Surgeons and Specialists in Nervous diseases.

153 BROADWAY, MADRAS.

KIDNEY POISONS ROB THE SUFFERER OF HEALTH, HAPPINESS AND LIFE.

THE KIDNEYS are the most important organs of the body, because they filter the blood. When they are well, they drive all liquid poisons and waste out of the body. But when they are sick, the whole body is sick, because of the poisons left in the system.

Dizziness, pains in the back, neuralgia, rheumatism, tired feeling, dropsy (swelling of the limbs), diabetes, bad blood; inflammation of the bladder, sleeplessness, nervousness, headaches, etc., come from the blood's impurities which the kidneys should have taken out. Good health can only be obtained when these very important organs are well. The blood must be fresh, clean and pure, with not a taint of poison in it.

Doan's Backache Kidney Pills heal the kidneys and help them to work naturally and to remove absolutely all disease-breeding impurities. They cure diseases by curing the kidneys. This kidney medicine will save you from Bright's disease, dropsy, and diabetes—will bring you back to good health.

Send for a free sample box of Doan's Backache Kidney Pills and see how much better you will feel after using it. Address your letter to FOSTER-McCLELLAN Co., 3, Wells-street, Oxford-street, London, W., England, and mention this paper. All chemists sell Doan's Backache Kidney Pills.

BOMBAY, FRIDAY, JUNE 16, WEATHER.

We see no reason for the alarmist opinions held by some regarding the lateness of the monsoon, as at present there seems little cause even for anxiety. A good rainfall at the end of this month and in July would be far preferable to early rain and a long break. During the week there has been rain at some stations in the Berars, and at Nagpur, Bhosawal and Indore, and though this is probably due to local climatic conditions, it should help to prepare the ground for sowing.

COTTON.

Since the departure of last mail there has been a steady rise in the American markets. Up to yesterday the advance in New York spot Cotton amounted to 40 points, and in July futures to 22 points. To-day there is a jump of 15 points in Spot and a further 22 points in July futures. In Liverpool the market closed strong on Friday last before the holidays, but on re-opening on Tuesday was easier. Wednesday's message reported a rise of 12 points in Spot and 11 points in futures, and to-day's 3 points in Spot and 4 points in futures. The "bulls" seem to have taken a fresh lease of life and have been strong enough to force prices up, but whether they will be able to maintain them, remains to be seen. Crop accounts received during the week have been favourable, and it seems doubtful in face of these reports, how prices can continue to rise. The large surplus of this season's crop must prove a weight on the market, and with a continuance of the present favourable weather in America we look for a reaction shortly.

The following are daily quotations for Spot Middling Americans in Liverpool and New York since the last mail left.

Liverpool.	New York.
June 9th...4·73	8·70
" 10th closed	8·70
" 12th "	8·17
" 13th...4·68	8·90
" 14th...4·80	8·95
" 15th...4·83	9·10

The following are the daily quotations for futures in Liverpool for June-July, and New York for July :—

Liverpool.	New York.
June 9th...4·80	8·18
" 10th closed	8·17
" 12th "	8·17
" 13th...4·55	8·37
" 14th...4·91	8·42
" 15th...4·70	8·54

The local market was easier at the commencement of the week and sellers showed more disposition to meet buyers. Exporters for Europe, however, held more or less aloof, and Mills being moderate buyers, the turn over was limited. The last day or two, owing to the continued rise in prices in America and the firmness in Liverpool there has been rather more enquiry, and Japan being in the market, a steadier feeling has prevailed. The demand has run on Bengals, Oomras and Broach, good prices having been paid for high class and stapled lots.

The "Sailing" market for New Crop has again fluctuated during the interval. Good Broach fell to Rs. 232 and rose to Rs. 237 and fully good Bengals, after touching Rs. 182 advanced to Rs. 187. The market then fell Rs. 3. To-day's quotations are as under. The market is very "touchy" and is governed by reports regarding the New Crop in America, and the weather conditions in India.

There has been some enquiry during the week from mills for fine M. G. Bengals for December and January delivery, and a small business has been done at about Rs. 205 for the former and Rs. 202 for the latter delivery, Mill terms. A Mill is also reported to have taken a line of fine M. G. Khangaum, Akola at Rs. 211 mill terms, January delivery. We quote :

		Rs.	
Good M. G. Broach	15th, 25th Mar. dely.	235	Sub-
F. G. Bengals	15th, 25th January	194 1-2	tas.

SEEDS AND WHEAT.

LINSEED.—Since our last report, this market has fluctuated somewhat. Having the early part of the interval the prices advanced to Rs 7-10 per cwt. for ready and Rs. 7-15 for September "Suttas," but owing to weaker advices from Home declined 2 annas per cwt. only however to recover again, and at the close the market is quiet as under.

RAPESEED.—The market has been dull during the week with little or nothing doing, and prices have declined 2 annas per cwt.

POPPYSEED has been quiet but steady, with a moderate business passing and rates are unchanged.

CASTORSEED.—This market has continued steady since we last wrote, and a fair business has been done at about the level of our quotations.

WHEAT.—The market opened steady at the beginning of the week, but the demand having fallen off, rates have given way slightly and we close as under :—

LINSEED—Tone quiet

The mail of the 16th June brings £70,000 silver and £60,000 gold to Bombay and the following Council Bills.

Calcutta	Rs.	9,50,000
Bombay	"	14,10,000
Madras	"	4,70,000
Total	Rs.	28,30,000

EXCHANGE.

The Secretary of State sold the 30 lakhs Council drafts offered on Wednesday last at 1s 4d Demand and 1s 4 1-32d Telegraphic, these prices being the same as last week's.

Sterling rates are steady. Two Banks have sold T. T. at 1s 4 1-32d for Cash, but this rate is not to be had at the close. We quote 1s 4d T. T. and 1s 4d to 1s 4 1-32d Demand. For July-August T. T. is also 1s 4d, while September-October could be obtained at 1s 4 1-32d if both months together. In Mercantile paper 3 months' sight D/A Bills are quoted 1s 4 5-32d and 6 months 1s 4 1-4d and these rates can be done up to the end of August.

There has been more business passing this week, but bills are still scarce.

GOVERNMENT PAPER.

Since our last report the Rupee paper market has been quiet with only a very moderate business passing, and fluctuations have been slight. The tendency is, however, for lower rates as soon as the New Loan is announced, as even the rumour of the announcement during the week was sufficient to cause a decidedly weaker feeling. The lateness of the burst of the monsoon is also having an effect on the market. We close as under.

3 1-2 per cent. cash	98?7

BULLION.

The silver market has fluctuated during the week in sympathy with London prices. The Up Country demand is about 80 bars per day. We close steady as follows :—

	Rs. a. p.
English Bar Gold	14 3 0
Australian Bar Gold	14 0 0
Bombay do	14 0 0
English Shield Sovereigns	15 2 0
Do. Dragons	15 0 0
Silver-ex-duty Ready	68 14 0
Do. 1st settlement	68 14 0
Do. 2nd do.	68 8 0

PIECE GOODS.

The market continues extremely quiet owing to the absence of demand from Up-Country, and no improvement is anticipated until the rains set in properly. There is little or no enquiry for forward delivery.

LOCAL YARNS.

The following telegrams have been received from China since the last mail left :—

	Unsold.	Unshared.	Weekly Sales
Shanghai	70,000	41000	3,800
Hong-Kong	27,000	32000	5,000
	97,000	73,000	8,800 bales

170,000 bales.

The local market is quiet but steady and quotations are unchanged.

METALS.

COPPER AND YELLOW METAL.—The market is quiet but steady, and no business is reported.

IRON AND STEEL.—The market is G. C. sheets is firm, and deliveries are good; but owing to the season having come to an end, only a small forward business is doing in nearly all descriptions.

SPELTER PIGLEAD AND QUICKSILVER are quiet and unchanged with nothing doing.

COALS.

The market has been dull during the past week, with very little enquiry on the part of buyers, and the only business reported is a few small lots of ready Cheberghar at Rs. 11-4 per ton. Quotations are as follows :—

Jharia	Rs. 11-0 Per ton.
Davidson's West Hartley	Rs. 13 do to Rs. 13-4
South Yorkshire	Rs. 13 do
Cheberghar	Rs. [illegible]

SHARES.

The market is steady. Bank of Bombay shares are reported to have changed hands at Rs. 1,370 and Rs. 1,372 1/2. In mill shares, Alliance are unchanged at Rs. 215. Bombay Cotton at Rs. 600, Bombay United at Rs. 510, Central Indias have improved at Rs. 1,875, Chinas after touching at Rs. 830 have again improved to Rs. 851, Connaughts are reported to have changed hands at Rs. 535, Colaba Land and Mill are unchanged at Rs 685, Koorla at Rs. 780, Currimbhais at Rs. 150, Davids after touching Rs. 335 have again improved to Rs. 397 1/2, Empress Mill shares have changed hands at Rs. 350, Framji Petits are quiet at Rs. 960. THE WILL OF AN ALLEGED LUNATIC.

At the High Court yesterday, the will of one Mankia Bend Mhitra, an alleged lunatic, formed the subject of an enquiry before the Hon. Mr. Justice Tyebjee. Cashinath Babun Bhoir, the sole executor of the will, applied for probate; and the application was opposed by Anant Balkrishna Pai and another as caveators. Mr. Rustom Wadia and Mr. Kolah, instructed by Messrs. Jamsetjee and Ranaoji, appeared for the petitioner; and Mr. F. Sorabjee Taleyarkhan and Mr. Jinnah, instructed by Messrs. Chitnis and Motilal, appeared for the caveators.

The petitioner stated that Mankia Bend Mhitra died on the 14th September 1902, leaving property within the town and island of Bombay and having a fixed place of abode at Wadalla village, near Matunga. He left a writing in the Marathi language, dated 17th July, 1902 which was his last will and testament. It was duly executed at Bombay and the petitioner was the sole executor named in the will. The caveators, executors of what the deceased may have been possessed of or entitled to as a trustee for another, and not beneficially or with power to confer a beneficial interest therein, and without deducting any debts due and owing from the deceased save and except the funeral expenses, but inclusive of all interest, dividends and increased value since the date of his death, were under the value of Rs. 7,000. Petitioner is the step-son of the testator's deceased sister and is his only next of kin according to Hindu law. No application had been made to any District Court or delegate or to any other High Court for probate or letters of administration with or without the will annexed.

The caveators said they were bona fide purchasers for value of the deceased's property mentioned in schedule annexed to the petition from Mankubai, widow of the deceased, under a deed dated 25th April 1893, for Rs. 2,257-11-0. The petitioner, at the time when they completed the purchase of the property and during the treaty of sale, was fully aware of the proposed sale, but he did not inform them of his rights to the property, nor did he inform them of the existence of the said will. They further said that the will was not the deceased's, and they denied that the mark appearing at the foot of the will was the work of the deceased. The latter was not, at the time he was alleged to have executed the will of sound mind, or understanding. The fact was that he was of unsound mind for several years before and up to the time of his death. The caveators therefore prayed that the petition should be dismissed with costs.

The hearing of evidence in the case was proceeded with.

INDIAN PUBLIC COMPANIES.

THE report of the directors of the Sirdar Carbonic Gas Company, Ld., for the year ended 31st March 1905 shows as follows :—The business of the late Sirdar's Carbonic Acid Inventions Syndicate Company, Limited, was taken over as a going concern on 1st April 1904, from the surviving trustee for the debenture holders, on the terms agreed upon with the latter, but owing to the death of Mr. Fakirchand Premchand, one of the Trustees for the property, considerable difficulty was experienced in completing the legal transfer. Meanwhile some of the debenture holders took advantage of the delay to apply to the High Court, with a view to invalidating the sale. This attempt was unsuccessful, and judgement was given on Monday, 10th April last, in favour of the completion of the sale as authorized by the debenture holders. All documents relating to the transfer of the property have now been completed, signed and registered: but as this did not take place till after the close of the financial year, the amount [illegible] reserved for the vendors in part payment for the property could not actually be issued until the documents were finally completed. Hence they are entered in the balance sheet as "reserved for issue to vendors." It will be readily understood that the above litigation has somewhat hampered active development of the business; but in spite of this past year has been a fairly prosperous one, and the profit and loss account shows a net profit of Rs. 23,054-3-1, after deducting debenture interest, depreciation on machinery and plant, and managing director's and manager's commissions. The stock is valued at lowest present values and has been carefully checked by the managing director and manager and also by the auditors. It is proposed, subject to the confirmation of the shareholders, to dispose of the profit as follows :—To pay a dividend of Rs. 7 per share being 7 per cent. per annum Rs. 11,934; to bonus to staff—1-2 month's salary, Rs. 993-12; to transfer to reserve fund, Rs. 7,000; to transfer to reserve for bad debts, Rs. 1,000; to carry forward to next year, 2,086-6-1; total Rs. 23,054-3-1. During the year the following additions and improvements have been made to the Company's works :—A large number of new flasks have been ordered and partly received. A new compressor has been ordered and is now shortly due at the works. This has also been partly paid for. Additional shed space has been completed nearly doubling the accommodation at the factory. A new and more powerful engine has been purchased and erected. The loan of the land upon which the Company's factory stands, expires at the end of this year. The directors have, however, been able to arrange with the Port Trustees to renew for a further period of 99 years at a moderate increase in rent. At the forthcoming general meeting Messrs J. B. E. Macbeth and J. M. Payne retire from the Board in accordance with clause 89 of the Articles of Association but being eligible offer themselves for re-election. Under the authority granted to them by the Articles of Association the directors appointed Messrs. A. F. Ferguson & Co., auditors for the first audit of the Company's accounts. These auditors now retire but offer themselves for re-election for the ensuing year.

THE PUNJAB EARTHQUAKE FUND.

The following further subscriptions to the Punjab Earthquake Relief Fund have been received by the Bank of Bombay :—

THE Japanese Government has placed an order for 100 powerful locomotives with the North British Locomotive Combine of Glasgow. The locomotives will be similar to those placed with the same makers a few months ago. The orders will be equally divided between the Dubs, Hyde Park and Atlas firms, which are in the combine.

IN the year 1904, the city of St. Louis did well in trade and industries. The great Exhibition, which lasted from the 1st of May to the 1st of December, of that year, attracted a great crowd of merchants from the south and west of the United States, who in many cases renewed trade connections or made new ones. In proof of the vigour of its commercial spirit it may be observed that 190 new factories, with a capital of seventeen and a half million dollars were established here last year; eighty-nine were closed, so that a net gain of one hundred and one remained. St. Louis exports chiefly cotton, maize, flour, beer, smoked and dried meat oleomargarine, carriages, agricultural machinery and electrical apparatus. The best markets are England, Mexico and Cuba. Most of the exports are sent to the Mexican coast, 900 miles away, whence agents and merchants ship them abroad.

FLORILINE.—For the Teeth and Breath.—A few drops of the liquid Floriline sprinkled on the tooth brush produces a pleasant lather which cleans the teeth, gums and mouth, leaving a delightful sensation of purity and freshness. It removes all unpleasant odours from the mouth. It preserves the teeth [illegible]

HEALING.

MR. W. F. CARROLL, who treats all diseases by "imposition of hands," (not Hypnotism Mesmerism, or Massage), can be consulted daily at the ADELPHI HOTEL, Byculla, from 7 to 9 A.M. and 6 to 7-30 P.M.

BLUTHNER'S
PIANOS ARE IDEAL
PIANOFORTES.

THE BLUTHNER PIANOFORTES must not be classed with the productions by makers who are keen in the battle-royal of competition as to who could produce an inferior Piano at the smallest possible cost. Mr. JULIUS BLUTHNER has secured the World's Highest honours by dint of energy and determination to perfect his productions and to construct Musical Instruments in accordance with the most approved modern standards and requirements worthy of the name of Pianofortes and to sell them at a moderate price which, compared with public waste of money on worthless articles, is not an excessive sum. The Bluthner Pianofortes are the only Instruments which will help to radically change one's whole life in the matter of Music in a few days. The mysterious secret of their wonderful success and their wonderful influence on Musical people is their marvellous Brilliancy, Sweetness and sympathy in Tone. The actions of the Bluthner Pianofortes being soft, easy and uniform, have the effect of rousing the pupil and the musician from careless interest to the highest possible attainment which natural ability warrants. They are the only Pianos, specially built for India, possessing soulful music in every string. All musicians regard the time when they started using a Bluthner Pianoforte as the best days of their lives.

THE TURF AND ITS CHIEF CHARACTERISTICS.

TO meet the demand for high class articles on the Turf, made by the general public as apart from the racing-man, we have arranged for a series of anecdotal and informing contributions. These are concerned with anecdote and reminiscence rather than with racing form, and emphatically deprecate that type of gambling which has attached itself to the noblest of sports. The following programme shows the open, healthy nature of the series, and the authors' names are guarantees of thoroughly popular and high-class treatment.

PROGRAMME.

THE B I S N Co's steamer Lhasa, 941 tons, Captain H McHarmed, sailed on Thursday for Karachi, with a general cargo and the following passengers—Sir E G Cox, Captain W G S Murphy, Lieut F A B Johnstone, Mrs A Gun-Cunningham, Mr D Fronna-Kides, Mr F Deacon, Mrs Master and daughter, Mr Gordon, Mr S Noorbhoy and 31 deck.

The Merchant Service Guild have been informed by Lord Muskerry that he has fixed Monday next 5th prox, for the Second Reading in the House of Lords of the Merchant Shipping Act Amendment (Aliens) Bill. The Guild have Business themselves for some considerable time in promoting this measure which seeks to enforce Brit ish ships being commanded and officered by British subjects and, in addition, to abolish the practice of granting pilotage certificates for British waters to aliens.

At the end of November last the steamer "Clan Mackay" was instrumental in saving the passengers and crew—nearly four hundred in all—of the Portuguese Transport "San Thome" which was stranded in a very dangerous position on the Farisan Bank in the Red Sea. Great difficulties and dangers were experienced in effecting this rescue owing to the strong wind, rough sea and force of current setting right across the reef. Furthermore, the utmost caution had to be exercised by the "Clan Mackay" owing to the dangerous reefs and to the locality being only partially surveyed. The rescue lasted from the early morning of the 25th November until 5 p.m. next day, when the Clan Mackay" steamed away having safely on board all the crew and troops of the "San Thome" together with their personal effects. The Merchant Service Guild have laid the full particular before the Portuguese Government with the result that they have received a letter from the Secretary to the Portuguese Legation in London stating that he has been requested by the Minister of Marine to convey to the Guild on the part of the Government of His Faithful Majesty their sincere thanks to the officers and men of the "Clan Mackay" for the more valuable service rendered and to inform the Guild that it is the intention of His Faithful Majesty's Government to confer a decoration upon the Captain of the "Clan Macky" Captain C. J. Higgins, M. S. G.

NOTICE.

SUPPLY OF ELECTRICAL ENERGY FOR LIGHT AND POWER IN BOMBAY.

A LICENSE to supply ELECTRICAL ENERGY to the public having been granted by the Local Government to the Bruse Electrical Engineering Company, Limited, a supply of Energy will be shortly available in the principal streets and roads of the Fort.

TARIFF.

(1) The charges for Electrical Energy will be on the maximum demand (Wrights') system.

(2) Readings of meters and indicators showing the maximum supply demanded will be taken once in every month.

(3) The Energy consumed will be charged for at the rate of 8 annas per Board of Trade unit for the first hour's use per day of the maximum supply demanded, as recorded by the indicator, whether for lighting or power; all in excess of this quantity will be charged at the following rates :—

(a) For lighting purposes or for lighting and power purposes when on the same circuit—3 annas per Board of Trade unit.

(b) For power purposes only—1 1/2 annas per Board of Trade unit.

(4) A minimum charge of Rs. 9 per quarter will be made to the occupants on behalf of every house, tenement, flat or other premises, whilst connected to the Company's mains, even if no energy is consumed.

Applications for supply must be made on a printed form which can be obtained at the Company's Office, Canada Buildings, Hornby Road, Fort.

FRANK W. CHANTER,
Agent to the Bruse Electrical Eng. Co., Ltd.

SATURDAY, JUNE 17, 1905.

WHAT IS MAN'S INHERITANCE?

WHAT part of our individuality we owe to our ancestors, immediate and remote, and what portion may be set down as a special development of our own, is a question that has provoked many theories. That we inherit qualities as well as features is incontrovertible, but that we have any right to the entail of the variations, physical or mental, acquired by our parents, however near or distant, is pure presumption. In a volume, "The Principles of Heredity" (J. Bell and Sons), G. Archdall Reid sifts the evidence available on this point, and conclusively shows that parental acquirements are never transmitted to the children, and he elucidates clearly and elaborately the origin of the variations that occur in families or in individuals. The book is mainly addressed to medical men, but it is brimful of interest to the general reader as well as to the professional biologist. It may disappoint or cheer us, according to the admiration or contempt we feel for our ancestors, to know that we owe our inborn traits or qualities to them, while our acquired characters are entirely our own, not handed down, nor can we hope that our descendants will inherit them. We may store our memory with all the lore of all the ages, our sons must begin life profoundly ignorant. We may break every bone in our bodies, but it does not follow that our children will come into the world with imperfect limbs. If acquired characters were transmitted, we should inevitably see a greater variety in the human race, and children would come into the world quite different from the type their parents represented, when they appeared on the scene. Not that great variety does not exist as it is, and children are not exact recapitulations of their parents, but the variety is in inborn traits, and these have always descended from some one or other of the multitudes of their ancestors. The adult man, as we know him, is "a huge superstructure of use acquirements, built on a comparatively slender foundation of inborn traits", and it is this power of acquiring suitable modifications under stimulation that differentiates the higher animal organisms from the lower. They profit by experience and the practice of this important faculty lies at the root of all the minor modifications that distinguish them. If these use-acquirements were transmitted we should see the child grow into adult size and strength without exercising its own limbs, and talk without any apprenticeship, whereas every individual has to go through time honored processes to acquire his physical and mental facilities. It is somewhat depressing to be told that there is a greater tendency towards reversion than towards progression, that instead of improving on its ancestry the human race falls back. In plants and birds this is easily proved, for the blue rock pigeon reappears, no matter how carefully he is eliminated from a stock, and the highly cultivated plant constantly reverts towards its wild parent type. Many biologists state that man's evolution has ceased, and Mr. Reid is of opinion that to a certain extent they are right. For man is now so civilised and has so mastered Nature that the struggle for existence is no longer obligatory as it was in the dawn of time. It is cruelly asserted that neither in body or in brain is the modern equal to the individual of the Stone Age, and in intellect the Greek of 2,000 years ago surpassed him. In sight, hearing and in teeth deterioration is the rule and regression is probably occurring in many other human faculties.

However, Mr. Reid reminds these pessimists that the arts of civilisation have, comparatively speaking, been exercised for a very short time on the human race which, he says, is of enormous antiquity, and quite as many observers of human nature hold that progression is the rule, not regression. The elimination of the unfit is at work as it ever has been, although medical science labours hard to give the weak as good a chance of life as the strong. But men, civilised men at least, in the great majority of cases die of disease. And where many are gathered together as in towns they are the victims of zymotic diseases caused by living beings of plant and animal species. The degree of acquired or inborn immunity or susceptibility of individuals to attacks of these diseases forms an interesting and instructive chapter that teems with instances of use to the bacteriologist and all tending to prove that the acquisition of immunity by individuals or by races is a result of acclimatisation or evolution, but it is seldom an inborn immunity. The toxin of snake-venom, we are told, may be swallowed in enormous quantities without ill-effects and, moreover, the consumer is rendered thereby immune to the venom injected under the skin. The Bushmen of South Australia take the precaution of swallowing the poison-glands of snakes, according to Fraser. That immunity cannot be inborn is shown by the fact that English children get whooping-cough and measles as easily as ever, though their race has been afflicted with those nuisances for centuries. To Polynesians, who have made acquaintance with them only during the last hundred years, they are nothing less than disasters and much more fatal, the English race having evolved a power of acquiring a certain amount of resistance. In Ceylon malarial fevers are less fatal to the native population than among European settlers for the same reason. The West Coast of Africa and the Terai have a very bad name as death-traps for Europeans, but England is just as treacherous to the natives of other quarters of the world. It is dreadful to read that prisons, convents and barracks are often hot-beds of phthisis the bacilli of which triumph over the acquired immunity or susceptibility of the inmates. It is not usual to look on bacteria as empire-builders. But this is just what Mr. Reid calls them, and he ingeniously shows that the bacteria unwittingly carried into the New World after Columbus gratuitously discovered it, resulted, in most cases, in the subjection and often in the extinction of some of the tribes found there. Small-pox exterminated whole tribes in the West Indies in 1507, having never been previously known there, and the disease naturally spread on to Mexico and smote "prince and peasant, leaving its path strewn with the dead bodies of the natives who [illegible] like cattle stricken with murrain." The men who had conquered remained masters; the victims of the newly introduced diseases could not in one generation or many evolve even a partial immunity. Some tribes are all but extinct, and others are fast disappearing. Carib, Red Indian, Tasmanian, Australian and Maori are but dwindling remnants "dying of imported diseases.

The Spanish conquerors placed the natives of the West Indies in the worst possible conditions for resisting the inroads of physical maladies. They were made to work in mines and in plantations, and collected in churches on days of rest. Conquest to be permanent, writes Mr. Reid, in the course of his immunity to disease argument, must be accompanied with extermination. And as England does not exterminate, it is, he thinks, highly improbable that the British will retain their hold on their Old World Dependencies. But in the New World, though extermination has ceased with the spread of civilisation, possession will be retained, and disease is being watched so carefully that it cannot come as a mysterious and devastating visitation any longer. All about most diseases is known, and they can be checked in their wild career, before they destroy or decimate whole peoples. What about plague, Mr. Reid? If disease is losing its power as an eliminating and selective agent, there are others that exercise as powerful an influence—the narcotics of alcohol and opium. Direct evidence of the extent to which alcohol causes death is unattainable, although the Registrar General puts it down at 26 per cent. But as here observed, "alcoholism" has very seldom a place in a British death certificate. Some other disease is entered that spares the feelings of the family, though a medical man may understand its meaning. In Switzerland the certificate is a confidential document and deaths from alcohol are acknowledged to be ten times more frequent than those admitted in England. The motives of men who drink, says Mr. Reid, are precisely the same as those which suggest to a girl the advisability of indulging in chocolate creams. Pity it is they do not have as innocuous a result. Most writers on drink are unfair to both the sober man and to the drunkard. They credit the first with self-control and a strong will, and the other with neither. This is far from being the case, writes Mr. Reid. The temperate man does not long for drink nor deny himself consciously and habitually. He is naturally moderate. The drunkard often vehemently desires to be sober, but his craving for drink is a still stronger feeling, and it is the strength of the temptation that generally decides the matter. A man who takes systematically doses of poison, which he knows will kill him eventually and that meanwhile afflict him with a number of evil consequences, must be very much tempted to go on with the practice. Being a poison and the cause of great mortality, alcohol becomes a selective and stringent agent of elimination and deterioration, and as such enter the purview of the argument of the inheritance of traits. We cannot here follow Mr. Reid in his charming and convincing excursions through the maze of the principles of heredity. It is all more than interesting. It is absorbing, and so written that the most ordinary intelligence can grasp his illuminated meaning. One final quotation we make which should keep learned men humble: "The real intellectual giants are little children. Adults are dwarfs standing on the shoulders of giants, on the shoulders of their former selves. . . The world would be different and infinitely better if grown people, in addition to their stored knowledge, could retain the child's power of learning, of changing, of growing mentally in response to fresh experience. The wheels of progress would move smooth and fast. There would be no poverty and no crime." A consummation devoutly to be wished whether it were an inherited or acquired blessing.

BOMBAY PRESIDENCY JAILS IN 1904.

THE annual administration report of the prisons and jails of the Bombay Presidency for the year 1904 makes a somewhat belated appearance due to unavoidable delay in the printing of the revised 3rd class Subsidiary Jail Forms. The total population of all classes of prisoners confined in prisons, subsidiary jails, lock-ups and civil jails, during the year, was 93,615 as compared with 94,258 in 1903. An increase under admission of convicts in the Common Prison is attributed to the newly appointed Honorary Magistrates in the City of Bombay sending prisoners under sentence of a day or even a few hours to the Common Prison; whereas the old practice was to detain such cases until the rising of the Court. Five prisoners escaped from within the walls during the year against seven in 1903. Of the five escapes, two got away from the Ahmedabad Central Prison, and one each from the Sind Gang, the prison of Karachi, and Common Prison, Bombay. Seven prisoners escaped from outside the prison and subsidiary jails against nine in the year 1903. Of the seven prisoners, one escaped from Dharwar, one from Ahmedabad, one from Karachi and one from Shikarpur prisons, one each from the subsidiary jails of Godhra, Bhusawal and Satara. Of the 12 prisoners who got away during the year, six were recaptured. The actual number of convicts, who passed through the Central and District Prisons was 24,378. Of this number, only 5,634 incurred any punishment, and in many cases the only record against a prisoner was one minor punishment. No less than 10,746 of the total number of punishments were minor and of these 1,729 were formal warnings and 4,820 such punishments as forfeiture of small amounts of remission, temporary reduction in grade, temporary loss of grade, privileges and changes of labour. Offences relating to work show an increase of 2,519 as compared with the previous year. This is due to an attempt to exact a proper task from all prisoners throughout the Presidency. During 1903 and 1904 the number of prisoners sentenced to rigorous imprisonment with solitary confinement has been exceedingly large as compared with previous years. The execution of these sentences has necessarily kept the solitary cells full. As a result of this, and owing to the frequent use of these cells for segregation purposes, Superintendents have been greatly hampered and have been unable to resort in any degree to those most useful forms of punishment—separate, cellular and solitary confinement. This is also a contributory cause to the increase in the total punishments. Major J. Jackson, I. M. S., the acting Inspector-General of Prisons, commenting on, the value of solitary confinement, remarks: "when a prisoner becomes sulky or defiant, there is no punishment so useful at the beginning as a term in a cell. There is then no association with other prisoners, no encouragement to persist in his misconduct, and no gallery to play to; whereas the reverse often occurs when other punishments are inflicted, and too frequently the culmination is some serious offence incurring the severest penalty." Serious overcrowding occurred in the Common Prison, the House of Correction and the Special Prison, Thana. In the Common Prison the evil was alleviated by the use of open sheds and by constant transfers to the Deccan Gang. The House of Correction and the Special Prison, Thana, have, in the past, been calculated as having accommodation, exclusive of Hospital, for 236 and 674 prisoners respectively. The real accommodation is for the former prison about 185 and for the latter about 584. The health of the prisoners was much the same as in 1903. A tubercle ward has been arranged for at Thana. Jails with a high admission rate of the tubercle are kept as free as possible from overcrowding. To render possible that early diagnosis, which is so essential in dealing with this d[illegible] microscope [illegible] three Cent[illegible] other p[illegible] Laborato[illegible] the mic[illegible] sary. Wi[illegible] convicts, [illegible] valued at [illegible] Departm[illegible] 1903.

THE SPEED OF SAILING YACHTS.

THOSE who are anxious to get an idea of the speed of a sailing yacht by comparing it with something familiar ashore may be interested to learn that the range and average of a good-sized yacht is about the same as that of a bicycle on the road. According to a table prepared by Mr. Dixon Kemp, the maximum speed of an 81-foot yacht is 11 1/4 knots, or 13 (land) miles an hour. The speed increases with the size of the boat, the progression in boats of similar design being as the square roots of the lengths on the water-line. A 144-foot yacht would have a maximum speed of about 15 knots, or 17 1/4 miles an hour. These speeds imply the most favourable conditions of wind and sea. There are a few authenticated instances of their having been exceeded, but never by much. As for average speeds eight or nine knots, or nine or ten miles, an hour are very good work. Another little point about which argumentative people are pretty sure to get at loggerheads is the exact meaning of a knot. Originally a knot was a measure not of distance but of rate. The old-fashioned log is a float attached to a line which is knotted at regular intervals, generally of about fifty feet to gauge the speed of the vessel, the float is thrown overboard, and of course the line immediately commences to run out. The number of knots (50 ft. intervals) that slip out in thirty seconds is the number of miles an hour at which the ship is moving through the water and leaving the float behind, thirty seconds being roughly the same fraction of an hour as fifty feet are of a mile. The miles are sea miles, of course, and a sea mile is about 1.81, 515 or 1 1/6, statute mile. To be precise a sea mile is a minute of latitude; that is, 1/60th of a degree, or 1/21, 600th part of the earth's circumference, if the earth were a perfect sphere instead of being nubbly.

AMONG the passengers who arrived in Bombay yesterday from Europe, by the P. and O. Co.'s mail steamer Arcadia, were The Hon. Mr. Justice Stanley and Hon. Mr. and Mrs. Austin.

COLONEL McMahon, with the first party of the Seistan Mission, has arrived at Quetta.

THE Chief Commissioner of Assam, who is now on tour, will reach Shillong on the 18th instant.

THERE is still no date fixed for the meeting of the Viceroy's Legislative Council at Simla, as only minor Bills have to be dealt with.

THE Secretary of State has sanctioned an estimate, amounting to Rs. 10,82,000, for the Nagavali River Project in the Vizagapatam District, which is to be undertaken as a productive public work.

MR. R. M. PHILLIPS, District Superintendent of Police, Ahmedabad, has been appointed Deputy Commissioner of Police, Bombay. Mr. Phillips took charge of the new appointment on Thursday last.

OWING to the outbreak of plague in Bahrein on the Persian Gulf, Bahrein has been declared an infected port, and the Plague Regulations issued by the Bengal Government will be enforced in the ports of Orissa and Chittagong against vessels arriving from that place.

MAJOR GODFREY, Political Agent for Dir, Swat and Unitral, recently held a conference at which the Nawab of Dir, his brother Alian Gul and the Chief of Barwa were present. These three swore solemnly to accept the agreement arrived at by the tribal jirgas as regards Mian Gul's claims.

THE returns of the Opium Revenue from the 1st April, to the end of May show that the figures for Bengal were 14 1/2 lakhs better than the estimates while the sales of opium on the Bombay side were 1 1/2 lakhs worse, the net result being Rs. 8,85,325 better than the estimates.

THE Madras Government have ordered the acquisition of an acre and a half of land in the Cuddapah District, the site of the buried Jain temple at Danavaipad, which it is intended to excavate. An acre of land required for the extension of the Conoor Railway station yard is also to be acquired.

THE area under wheat this season in the Central Provinces is returned as 3,069,111 acres. This is 5 per cent above the area of the preceding year, and exceeds the quinquennial and decennial average by 38 and 21 per cent, respectively. The area in Berar aggregates 427,333 acres, which is 6 per cent less than the area reported during the year 1903-4 and the average of 10 years, and 77 per cent above the quinquennial figure.

THE District Board of Kurnool had allotted a sum of Rs. 4,42,630 in its Budget estimate for 1905-06, for expenditure on the construction of the Kurnool Dhond Railway, but this was struck out by the Madras Government as no corresponding provision had been made in the Civil Budget estimate finally passed by the Government of India. The District Board has been requested to submit proposals for the investment of the proceeds from the Railway cess which may not be required for immediate expenditure.

ONE suggestion might be made to the Railway Board in the matter of the annual Administration Report of Indian Railways. This is that the principal returns in the introductory paragraphs, now given in crores and lakhs of rupees, should have the sterling value attached to them. The Report is intended for circulation at Home as well as in India, and pounds sterling are more easily understood in financial circles in England than rupees. The plan adopted in the Budget Statement might be followed with a few modifications. In the tabular statements the rupee must still be left as the unit of calculation.

MUNICIPALITIES in India are often accused of wasting money. The Burma Municipalities have gone one better. They have lost it. The Akyab Municipality sustained a loss recently of Rs. 2,500 owing to the frauds of a clerk and want of care on the part of responsible officers; the Rangoon Municipality lost Rs. 900 and the Sangaing Municipality Rs. 1,300 for similar reasons, while the Minbu Municipality and the Nyaungu Town Fund suffered losses to the extent of Rs. 600 and Rs. 200, respectively. In Bhamo and Shwebo the Municipal accounts were in a state of hopeless confusion, and the auditor experienced considerable difficulty in checking them. There seems to be some advantage after all in living in that part of the world.

FROM the Budget Estimates of District Boards, which have been accepted by the Madras Government, writes the local paper, we notice that the funds of several of these bodies are being so greatly absorbed by expenditure on plague that they have not sufficient left in hand for applying to other administrative requirements. In many instances the Budgets close with deficits, to meet which the Boards apply for special grants and loans from Government. The Government have sanctioned Rs. 15,000 as a Provincial grant and Rs. 40,000 as a special loan to the Coimbatore District Board. In the case of the District Boards of Salem, Guntur, and Trichinopoly, the Government have ordered that the deficits in their respective Budgets should be met by the temporary appropriation of the required amounts from the Railway cess which has accumulated to the credit of these Boards.

"Far East" writes to the "Times":—Just 10 years ago, in May 1895, I passed through Chefoo and saw the Russian Pacific squadron of that day lying in the roads cleared for action against the Japanese in the event of the Mikado's Government rejecting the demand peremptorily put forward by Russian diplomacy, backed up by Germany and France, for the surrender of the fruits of Japan's victories in the Liao-tung Peninsula. Most of the ships that were then preparing to coerce Japan formed part of the third Baltic squadron which Togo has sunk or captured. Surely history has seldom recorded so striking a Nemesis.

THE opening meet of the Coaching Club in Hyde Park on May 27 was, in every respect, a brilliant function. The weather was delightful, and the well-dressed crowd of sightseers, in carriages and on foot, was quite up to the usual average, both in [illegible] and importance, when [illegible]

INDIA IN PARLIAMENT.

TITLE OF THE RULER OF AFGHANISTAN.

IN the House of Commons, on Friday, May 26, Col. Legge asked the Secretary of State for India: When the title of the Ruler of Afghanistan was altered from Ameer to King, and his style from Highness to Majesty, what is the reason for the alteration; whether it has been notified by proclamation in Darbar; whether it makes any difference in regard to the relations of Afghanistan with foreign Powers; whether the letter from the Viceroy of India of Feb. 22, 1883, referred to in paragraph 2 of No. 4 on page 6, and the Agreement of 1872 between Russia and England referred to in No. 5 on page 7 of Cd. 2334 of 1905, can be printed and delivered to members; and, whether he will cause a map of Afghanistan, showing the boundaries agreed upon between the Government of India and the Ameer, to be placed in the tea room.

Mr. Brodrick: 1. The title of King was used by the late Ameer of Afghanistan and was never questioned. Its use makes no difference in the relations of Afghanistan with foreign Powers so far as our agre

PEACE NEGOTIATIONS.

INSULT TO JAPAN.

PETERSBURG PRESS OPINIONS.

THE TSAR AND THE ZEMSTVOISTS.

STRIKE MOVEMENT IN RUSSIA.

[THROUGH REUTER'S AGENCY.]

LONDON, JUNE 15.

A telegram from Washington states that it is officially announced that Washington will be selected for the conference of Plenipotentiaries.

LONDON, JUNE 16.

M. Takahira, the Japanese Minister at Washington, has notified President Roosevelt Japan's refusal to go to Europe.

Russia has acquiesced and joined Japan in requesting that the meeting be at Washington.

The St. Petersburg Press continues to comment arrogantly on the peace suggestions, declaring that Japan needs peace more than Russia.

The Tsar having notified he would receive some but not the whole of the delegates of the Moscow Zemstvoist Congress, the Delegates have decided to decline the audience.

A conference of engineers held at Moscow decided to join the general political strike. This is the first signal for the purpose of entirely stopping the economic life of the country.

LATER.

The announcement that Washington has been accepted as the meeting place appears to imply that progress is being made for peace, otherwise nothing whatsoever is known about the perleyings.

GRAND DUKE ALEXIS RESIGNS.

Command of the Russian Fleet.

The Tsar has accepted the resignation of the Grand Duke Alexis as Supreme Chief of the Fleet, and Navy Department, but he retains the dignities of Grand Admiral and Aide-de-Camp to the Tsar.

CHOLERA ON THE SIBERIAN RAILWAY.

Outbreak at Tomsk.

It is reported that cholera has appeared at Tomsk on the Siberian Railway.

GERMAN STEAMER SUNK BY A RUSSIAN.

Crew at Batavia.

LONDON, JUNE 15.

The Russian auxiliary steamer Don sank the German steamer Letartos on the 30th ultimo, between Japan and Tientsin.

The crew were landed at Batavia.

THE ACCIDENT ON THE MAGNIFICENT.

Four Deaths.

The enquiry into the accident on board the Magnificent shows that the cartridge of the shell missed fire, whereupon the breech of the gun was opened and an instantaneous explosion followed.

Lieutenant Kenneth Stobart and three men have died from their injuries.

AFFAIRS AT ATHENS.

Panic Feared.

The fears of a panic on the Greek bourse have subsided, all the Deputies went to the residence of M. Delyannis to-day and escorted his remains to the Chamber of Deputies which was converted into a "Chapelle Ardente."

LONDON, JUNE 16.

M. Delyannis died in absolute poverty. His two nieces with whom he lived will receive a pension.

THE FRENCH PORTFOLIO OF FOREIGN AFFAIRS.

M. Rouvier Remains.

LONDON, JUNE 15.

M. Rouvier has decided to retain the portfolio of Foreign Affairs for the present.

DEATH OF MAJOR WISSMANN.

Accidentally Shoots Himself.

LONDON, JUNE 16.

The death is announced of Major Wissmann, ex-Governor of German East Africa, who has accidentally shot himself.

THE MOROCCO QUESTION.

Powers and the Conference.

Austria, Italy and America have intimated they are prepared to join the Conference regarding Morocco, provided always that the Powers chiefly concerned accept the invitation.

PLAGUE IN ENGLAND.

A Case at Manchester.

A death from plague has taken place at Manchester, the victim being a sea cook from Buenos Ayres via Hamburg.

JEW COLONISATION OF EAST AFRICA.

The Zionists against the Scheme.

The report of the Zionist Commission has been published. Messrs. Kaiser and Wildbusch are not in favour of the scheme for the colonization of East Africa.

GOSSIP OF THE WEEK.

LONDON, JUNE 2.

BRIDE OR SPINSTER?

THE Marquess of Bute, in taking his bride with him in his yacht to Scotland, is in a happier position than a London barrister of whom one has heard. While in Scotland he became enamoured of a pretty Highland lassie who, however, did not in the least reciprocate his affection. Still by some means the lawyer and the lassie met one night at the house of a mutual friend, and some imp of mischief suggested that he and she should go through the form of marriage—for a lark. The two joined hands in the usual way, and answered the questions proper to the occasion. But Scots law is a tricky institution; the barrister was assured by those who are supposed to know that he was legally married to the girl of his heart. So he manned his yacht and went back to fetch his bride. She would not hear of it, but put out for the wilds, and, when last heard of, he was still chasing her.

SEVERED BONDS.

In the course of history there have been young ladies whose anxiety has been not to avoid marriage, but quite the other way about. One young woman, to gain the love of her chosen, actually consented to spend the honeymoon on the summit of Mont Blanc. Last year a girl married a man who came to her straight from the cell in which he had been wrongfully incarcerated. Another of her sex, preferring love to reputation, married a criminal under sentence; and a pretty gipsy girl became the wife of her lover during the hour's respite granted him by the magistrates at Manchester. In places where they are not English it happens that the Mayor has to tie the nuptial knot. Algiers is a case in point, and the consequence was disastrous a little while ago, when that functionary, after having solemnised a number of marriages, was declared to have been wrongfully elected, and all his official acts null and void. They got over a difficulty of this sort at Mansfield last year, where, owing to a hitch in the ceremony when first performed, the young couple got married a second time the same day.

CLEAN SWEEPS.

The chimney sweeps of Berlin will not for the first time meet their Emperor and Empress on the occasion of the Crown Prince's wedding. Some of them, at any rate, have been, quite against their will, received in the Imperial palace. How it happened nobody seems to know, but very early one morning the Royal couple were awakened by stealthy footsteps in their bedroom. It is to be hoped that the Emperor was not unduly alarmed, but the Empress was terrified, and not without reason. There in the room were two or three grim-faced, black wretches, moving softly with mysterious sacks and props. They were the sweeps come to cleanse the flues of their Majesties' chimney. By one of those ludicrous mistakes which seem possible only in a strictly governed Royal palace, they had been permitted to blunder into the room before their Majesties rose. In what fearsome dungeon they now languish reports do not show.

THE AGE OF MIRACLES.

So many stories are told of men like Mr. Chauncey Depew that one is never surprised to see another fathered on him. Another has been added recently to his list. How do these good things attach to a great man name? Edison is the man whom they find it convenient in America to make responsible for any orphan anecdote. He sees all the stories, for they send him a batch of cuttings each morning. They are one of his daily diversions. I am 998 years of age, he told a visitor not long ago. How do you make that out? he was asked. Why, its is the newspapers, answered the inventor. We amuse ourselves at home by collecting these yarns, and calculating how old I should have to be to have lived through the adventures with which I am credited. Last night I was 976 this morning's batch makes me 998; and I fully expect to be 1,500 before mid-summer.

AN INVERTED LAW.

The strictures of Lord Justice Vaughan Williams upon judicial joking are not the first nor the strongest called forth by this habit. Judges have joked ever since they had a bench on which to sit, and each generation brings the man who condemns the habit. The strongest censure came from the lips of a Lord Chancellor, who made out a very bad case against the judicial humorist. The point is the subject of an old joke. A witty Irish barrister who had not troubled to succeed in his profession said to a very stately successful judge, You are a phenomenon in opposition to all the laws of natural philosophy. You have risen by gravity, while I have sunk by my levity.

WITHOUT PREJUDICE.

The London barrister who very smartly chased and overhauled a man whom he charges with having stolen a silver box from his drawing-room was not so drastic in this treatment of the suspect as a certain judge now on the Bench. Come and see my burglar, he is said to have remarked to his friends, and to have led the way to an outhouse where, miserable as sin, crouched the gentleman described. He had been caught by the judge's man in a fowlhouse, brought into the drawing-room, and given his choice—summary punishment without the aid of the law, or trial in the ordinary course at the police-court. He chose the former, and did his work in the judge's back garden. To save himself, his captor made it perfectly plain that the prisoner entered voluntarily into bondage.

A GRIM SEQUEL.

In that respect he was more wary than another judge still on the Bench of whom the queerest story is told. At an Assize in the North he discovered that a man tried for murder had just come out of a public house before committing the act in respect of which he was indicted. The judge commented vigorously upon the conduct of the publican in serving the man, and bade him go into the dock beside the prisoner. So far we are all familiar with the story. But, so it has been stated in print, there is a sequel. The publican is said to have instituted an action against the judge for unlawful imprisonment, and so the story runs, the defendant in the case was advised by his judicial brethren that he had not a leg to stand on. So, without more ado, like the good sportsman he is, the judge paid up handsomely. His action is said to have cost him a level six hundred pounds.

D-DOUBLE-D.

If anyone had predicted fifty years ago that any man within the next half century would make seventy thousand pounds' profit, as the late Mr. Lionel Joseph did, from the manufacture of tramway rails, he would have been denounced as a lunatic. British conservatism never more asserted itself than when railways and tramcars were projected. They broke the spirit of even the heroic George Francis Train, when he came over from America to revolutionise street locomotion. His plan was a very daring one—he actually proposed to lay his first London line up Ludgate Hill. His own version of the public inquiry was to the effect that the main opposition came from a peer with a monocle, who thus addressed him: "You know, of course, how very narrow is Ludgate Hill. Suppose that when I go down to the mansion house in my carriage, one of my horses should slip on your d——d rail and break his leg would you pay for the horse?" Train replied very amiably, "My dear, if you could convince me that your d——d old horse would not have fallen if the rail had not been there, I certainly should pay for it."

A SAVAGE ASSEMBLY.

Are you a Savage? If so, the tramway merits your respect. If there had been no tramways in England there would have been no Savage Club. Train, when he got his first bit of line in working order at Birkenhead—for it was there that the first trams in England ran, after Liverpool had scorned the idea—having got this line in working order, Train, who all the time had his eye upon London as the centre of operations, invited a number of journalist from London down to the Mersey side town to see the new wonder. It would have to be a great curiosity in tramways nowadays to take men out of London, but, fifty years ago, the scheme was as much a novelty as the motor-bus is to-day, and down went a very influential crowd of writers. Seeing so many men of letters together, Train suggested the organization of a literary club, and this, he asserts, was the germ out of which sprang the Savage Club.

THE UNSPEAKABLE.

It must always be very awkward to meet a person with whom you cannot communicate, especially if, as in the case of the young lady with very little on whom they have captured in a Bohemian forest, the stranger happens to be a savage. But we need not go as far as Bohemia to experience the difficulty. In one of your own courts the other day the magistrate had before him an Englishman with whom it was impossible to hold communication. He had been rendered deaf and dumb by an accident a year ago, and had not learnt the language of people reduced to his condition. Stranger still however is the case of a couple of brothers who could not converse one with the other. The explanation is simple enough. They were both born in Wales, where the either remained. The other came to England as a child, forgot all about his mother tongue, and went back to visit his home in the wild hills as a full-grown man. The elder had no English and the younger no Welsh, and sons of the same mother and father had to seek the aid of an interpreter.

MISDIRECTED GENIUS.

Englishmen as a whole are not ready linguists. Foreigners are; as children they learn several languages equally readily with their own. Even a poor man's child in Holland will answer you in French and German, and many of them even in English. The Englishman abroad has to rely to a great extent upon the interpreter. This, of course, is pronounceedly so in the East, and the result is often surprising. Babu English is something to wonder at; but, when you get one of these scholars to translate for you into his native tongue, this, a missionary declares, is what happens:—The hymn Rock of Ages, cleft for me Let me hide myself in Thee, is when translated back into English, represented as:—Very old stones, split for my benefit. Let me absent myself under one of your fragments. Language such as this it must have seemed to Scaliger when he said of the desperate tongue of the Basques, 'Tis said the Basques understand one another; for my part I will never believe it.

Worry and Anxiety

almost inevitably lead to a weakened and impoverished condition of the nervous systems These are forms of mental and nervous fatigue, and indicate that the nervous system is unequal to the demands made upon it by business responsibilities, social obligations, or professional duties. Such feelings give urgent and emphatic warning that the entire nervous system has become enfeebled, either as a consequence of nervous overstrain or owing to imperfect nutrition, resulting from physical illness or disorder.

Nervous Debility

of which worry and anxiety are such distressing symptoms, demands special treatment the nature of which is easily understood. If the body be weak it shows that fitting nourishment is required, and the same is equally true if the nervous system be weakened. It needs proper nutrition.

But how seldom the exhausted nervous system receives the right treatment. In many cases stimulants are resorted to, which give merely fictitious and temporary strength to the nerves, but actually leave them more weakened and worn out than before. If the nervous system be exhausted it really requires a remedy that will assist the nervous system to assimilate nourishment from the ordinary food, and will at the same time supply the vital nerve elements which are lost under the strain of overwork. Such a remedy is found in

Bishop's Tonules

A Nerve Nutrient not a Stimulant.

Bishop's Tonules are a thoroughly scientific preparation, free from harmful drugs and act directly upon the nerves, improving their nutrition, building up the worn away tissues, and restoring the impoverished nervous system to full health and vigour.

To understand how and why Bishop's Tonules do this it must be borne in mind that in nervous disorders generally the nerve and brain substance is worn away faster than it can be replaced. The nerves also lack the power to extract from the food taken the elements which they have lost, and until they can do this there can be no improvement in their exhausted condition.

The principal of these nervous disorders are as follows: Nervous and General Debility or Impaired Vitality, indicated by Lassitude, Fatigue, Want of Mental and Physical Energy, Weakened Will Power, Inability for Sustained Mental Effort, Irritability and Brain Fag, Nervous Exhaustion, Indecision and Lack of Confidence and "Pluck," Mental Depression, Worry and Anxiety, Forebodings, Morbidity and Melancholy, Neurasthenia, or a worn-out condition of the Nervous System generally, characterised by Headache, Vertigo, Muscular and Nervous Prostration, and Diminished Mental Powers.

There is no pretence that Bishop's Tonules do anything magical or extraordinary They simply supply those elements that are lacking, and supply them in such a form that they can be taken up easily and naturally by the nerves. Hence it is only reasonable to expect nerve restoration where they are used.

Obviously this takes time, just as an ill-nourished body cannot be built up in a day; but the result of a continued course of treatment by Bishop's Tonules will be the restoration of the nervous system to perfect health and strength.

The effects of the Tonule treatment may not be apparent immediately, but after a short time there is an improvement in the appetite, the assimilation of food is promoted, the liver stimulated, and the flow of bile increased. The various organs of the body all show improved activity and the building up of the tissues is hastened. The eyes grow brighter and the complexion more healthy. There is a tendency for thin subjects to gain flesh, while soft and flabby flesh becomes firm. In addition to all these evidences of the power of Bishop's Tonules, the symptoms of nervous debility and exhaustion gradually disappear, and it is only a question of time as to how long it will take for the whole nervous system to be restored to full strength.

Bishop's Tonules

A Fortnight's Treatment 2/9.

A letter has just been received from a gentleman in Hampshire in the following terms:—"I have now gone through a fortnight's course of Bishop's Tonules with great benefit. I was suffering from nevousness and depression, and these have almost disappeared, especially the latter. I took one Tonule with each of my three meals."

Bishop's Tonules are supplied in vials containing a fortnight's treatment, made by Alfred Bishop (Limited), Spelman-street, Mile End New Town, London, supplies may be obtained from any chemist or drug store for 2s. 9d. Alfred Bishop (Limited) are Manufacturing Chemists only, and have but one address.

There are two points we wish specially to emphasise. One is that it is supremely unwise to delay commencing treatment. If you are suffering from nervous Bishop's Tonules if you recognise that you are suffering from nervous ... brain exhaustion. Your condition will become ... and you may have a serious breakdown ...

A SOLVED QUESTION.

THE QUESTION now-a-days among Smokers is, Why should Vafiadis' Cigarettes be so largely distributed?
The answer is not far to seek.

It is because Vafiadis having had a life-long experience in Tobacco knows what is suitable for this peculiar climate of India, and it also is because their only intention is to satisfy their thousands of Customers by guaranteeing a new consignment of their Cigarettes every fortnight days.

To the above facts it is due that their Cigarettes are so highly praised and smoked by the ..ng, and are pronounced by connoisseurs to be superior to all others.

SOLE IMPORTERS,

Pears' Soap

beautifies the complexion, keeps the hands white and imparts a constant bloom of freshness to the skin. As it is the best and lasts longest it is the cheapest.

Liqueur Exquisite, Tonic, Digestive and Efficacious

BENEDICTINE

Possessing most Powerful Germ-killing Properties.

The **BENEDICTINE** liqueur is beneficial to health owing to its spirituous foundation being composed only of eau-de-vie (brandies) of the very purest quality.

Its principal characteristics may be summed up as follows:—

Distinctness of taste, richness of flavour and a delicious bouquet improving with age.

Moreover, the fact has never been disputed, that when diluted with cold water, the liqueur is possessed of great *ANTIAPOPLECTIC (against apoplexy, sudden loss of sense and voluntary motions), APERIENT (slow purgative), DIGESTIVE* and *ANTISPASMODIC (against convulsions,* qualities). *REFRESHES* and *STRENGTHENS* the nervous and tired brain marvellously, and works as a perfect boon to invalids and a blessing combined with luxury to mankind.

Many celebrated doctors and literary men both in France and other countries have given the liqueur the brilliant testimony of their appreciation, as may be seen by the following letters:—

* * * * Those of my readers who have confidence in my culinary recommendations, and I trust they are many, will do well to note that I prefer BENEDICTINE to all other liqueurs.

ALEXANDER DUMAS.

* * * * At a time when the luxuries of the table are sought after on all sides, I do not hesitate to acknowledge and recommend BENEDICTINE as the queen of liqueurs, now to be seen on any table. It is found and appreciated alike in restaurants, in private families, and on the tables of princes.

H. DE PENE.

* * * * * We place BENEDICTINE upon our tables for its excellent flavour and delicate perfume, without thinking that this dainty is a powerful specific, a liqueur most efficacious for promoting digestion and the regular circulation of the blood.

TIMOTHEE TRIMM.

LIQUEUR BENEDICTINE.—Among the liqueurs invented or manufactured by the monks of France, the Benedictine from a hygienic point of view occupies the foremost rank. It is not only an exquisite and savory beverage for persons in good health, but in cases of illness or recovery it is equally beneficial. It may be used to advantage in all cases where Malaga, Madeira, Sherry, &c., are recommended.
The Benedictine is remarkable for its agreeable taste, and for its really salutary effects as a stomachic; and it is principally on this account that the liqueur should bear the motto "Moritur qui non utitur."
Extract from the "Gazetto Medicale."

After meals we know of nothing more agreeable than a small glass or two of BENEDICTINE. It perfumes the breath, delights the palate, promotes digestion, and is a powerful aid to an inactive or overloaded stomach. During an epidemic, and for combating the evil effects of an impure atmosphere, its curative action is indisputable. At the beginning of last autumn we had occasion to appreciate the full value of this liqueur, and we are now happy to give it our highest praise.

DR. MALLET, M.D.

We place all our confidence in the hygienic properties of BENEDICTINE. Invalids and those who suffer from diseases of the respiratory organs, affections of the chests, headaches, congestion of brain, etc., and who cannot take other liqueurs, can safely make BENEDICTINE their favourite drink as a finish to their meals.

DR. ACHILLE PEQUEUR, M.D.

I consider your excellent liqueur invaluable to the old who so frequently suffer from indigestion and attacks of biliousness which often prove fatal. BENEDICTINE has long been well known to me, and it was with great readiness that I ordered our religious and my head resident doctor to administer it as a cordial according to your directions.

DR. J. ROUX DE BRIGNOLLES.
Chief Physician & House Surgeon, Charitable Hospital of Marseilles.

KNIGHT OF THE LEGION OF HONOUR

LIGHT-BROWN COD LIVER OIL

...PUREST, THE MOST PALATABLE, THE MOST DIGESTIBLE, THE MOST EFFICACIOUS.

Incontestably proved by Forty Years' Medical Experience to be
The only Cod Liver Oil which produces the full curative effects in
...UMPTION AND DISEASES OF THE CHEST, THROAT AFFECTIONS, ...ERAL DEBILITY, DISEASES OF THE SKIN, WASTING DISEASES ... CHILDREN, RICKETS, AND ALL SCROFULOUS DISORDERS.

...E MOST MEDICAL OPINIONS.

...Sir THOMAS GIBB, Bart., M.D.,
...Physician to the Westminster Hospital.
"I find DR. DE JONGH'S LIGHT-BROWN COD ... as a therapeutic agent in a number of ... of an exhaustive character, has been ... world of medicine; but in addition, ... a remedy of great power in the treatment ... of the Throat and Lungs, especially ... of the latter, where it will sustain life ... fails."

DR. ...CLAIR COGHILL,
...Physician to the Hunterian National Hospital ... Consumption, Ventnor.
"I ... in Tubercular and the ... DE JONGH'S ... OIL possesses greater ... Cod Liver Oil with ... was especially noted, in a ... never be ... the patients protected ... (that DR. ... or disguise Cod ... taken readily ... oil) was not only ... benefit."

JOSEPH J. POPE, Esq., M.R.C.S.,
Late Staff Surgeon, Army, Professor of Hygiene, Birkbeck Institution, London.
"I found during my Indian experience that the worth and character of DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL remained unchanged by tropical heat or foreign climate, and it was, from its uniformity of character, particularly adapted for long-continued administration. The value of 'hydro-carbons' in all debilitated states of the system is now becoming thoroughly recognized; and it is, without doubt, from the animal oils and fats, rather than from their vegetable substitutes, that we may hope to derive the purest benefit. The Oil of DR. DE JONGH places in everyone's reach a reliable and valuable remedy, one that cannot be too widely recognized."

DR. R. G. CROFT,
Author of "Hoadleigh," "In the Nursery," &c.
"DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL is almost a specific in many of the diseases peculiar to Infancy and Childhood, and I have never known so marked benefit produced by its use. Patients prefer it to the Pale Oil, and are able to retain it more comfortably."
